5

EARTHSTRAWS

An afterthought until it is all you can think about. Dump those paper and plastic straws, and check out our collection of Natural, Black and customizable straws.

3

SUSTAINABILITY

Learn about our product journey and your role in our circular economy in the fight against Carbon emissions and Waste.

7

EARTHTEENSILS

The original earthtensils were our first development for those weary of wooden utensils and other inferior options. Complete your disposable set with a classy touch that will cut through steak and Climate Change.

4

PRODUCT OVERVIEW

Review our collection and learn about our compostable options that will satisfy your needs for every event!

9

EARTHTAINERS

Whether you are enjoying a picnic, or taking your food to go, enjoy our selection of cost-effective sustainables that will make your guests leave with a smile--and the planet too.

HOME OF THE EARTHSTRAW PLANT-BASED DISPOSABLES

Dive into our collection and sip sustainably knowing you're making a positive impact on the environment.

WELCOME

GreenTek Planet - Sustainability is the Future

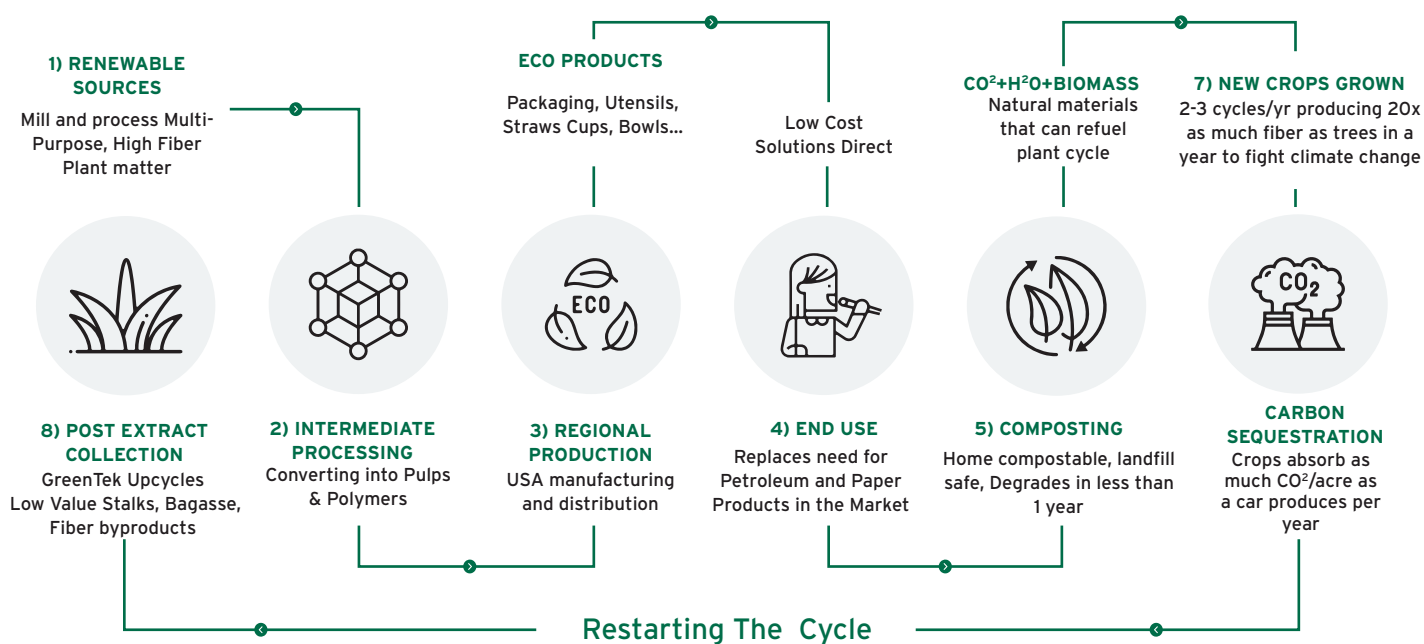

Since 2019, the vibe is elevation by education. Started by a small team of engineers & environmentalists from Long Beach looking to fight climate change, GreenTek Planet took off when the LB Collective Association connected them with farmers who were destroying thousands of pounds of plant stalks after their harvest. Using the agriculture residues to make compostable plastics and other products, the team at GreenTek was accepted into the LA Cleantech Incubator Cohort 2 to align with the city's initiatives to reduce single waste plastics.

After substantial product development, GreenTek is sharing it's outstanding solutions to the plastic/paper crisis in the Earthstraw, with the first biodegradable straws, utensils and containers made using American hemp, the crop our country depended on for rope, paper, and hundreds of other uses before it was mistakenly banned with its well known, psychedelic sibling. For the forward thinking, GreenTek Planet products are the crown princes of sustainability!

BREAK FREE FROM PLASTIC WITH THE LOW-COST CHAMPIONS OF SUSTAINABILITY

"ECO-FRIENDLY FOR THE SAVVY, THE CLASSY, & THE FRUGAL"

GreenTek Planet is the country's leading manufacturer dedicated to circular economies in agriculture and plastics. By upcycling the natural byproducts of farmers' high volume, non-psychoactive hemp harvests, we are able to offer a cost effective, net negative carbon product that employs Americans, cuts down on Greenhouse Gases and plastic waste, and still outperforms those silly paper straws and horrible foam packaging. So enjoy your meal with us, where the Classy and the Savvy sit together.

UPCYCLING LIFESTYLE

They say there's nothing new under the sun--So reusing what we have is in tune with the Universe, and that's a rhythm we jam to. Products like EarthStraws, Earthtensils, and Earthtainers are our clever way of reducing the production of unnecessary plastics tied to eating on the go. Made from leftover plant matter and compounded into pulps and resins, this journey from seed to shelf to soil is one worth repeating, over, and over, and over...

LESS CO₂, MORE COMPOST

Plant fibers are often burned after harvest, releasing Green House Gases and worsening climate change. GreenTek utilizes these materials to make disposables that stand out from the rest, avoiding confusion with traditional plastics. When tested in an powered home composters (like Lomi!) and industrial aerated compost heaps with common, active microbes, our products can be reduced to environmentally safe elements. Don't be fooled by alternatives which never degrade.

PRODUCT OVERVIEW

SOLUTIONS TO EVERYDAY PROBLEMS.

- GreenTek is a Domestic Leader in Single use Hemp Pulp and Biopolymer Solutions
- Soil/Home compostable options, 100% bio-based, Always PFAS -FREE
- Ability to deliver custom options to meet any demand

EARTHSTRAWS™

Paper Straws are, at the very least, for the Birds--let's stop cutting down trees to make these inferior substitutes. On GreenTek Planet we #ThinkDifferent. Our Straws are the best option on the market: Ultra-sustainable, low cost, available in Natural, Black, Wrapped, and customizable. These compostable straws allow you to enjoy your entire drink with a net positive impact on the environment.

EARTHSTRAWS™

EARTHTENSILS™

Sometimes using a single-use utensil is unavoidable - so go Sustainable, and transform your brand with the best plant-based option on the market- Earthtensils™ Domestically grown Hemp takes Carbon out of the atmosphere to build its stalks. By manufacturing them into supplies, you prevent that carbon from being released back into the air. Designed to handle a snack or a steakhouse, these innovative plastic alternatives will have your customers thanking you for being an Environmental Advocate this world needs.

EARTHTENSILS™

Using Hemp: the GreenHouse Gas Champion

Complete your set of GreenTek products with a set of Earthtensils™. Available for Enterprise solutions, that can be custom embossed or packaged with your brand to ensure customers know you are fully committed to the environmental mission and functionality. Satisfaction guaranteed.
